REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1 and 3-8 are allowed as the prior art, in particular Wu (U.S. Pub. 2003/0014687), Chng et al. (U.S. Pat. 7,051,154) and Chung (U.S. Pat. 6,094,317), does not teach or suggest the applicant's invention. Claims 1 and 7 teach a method and apparatus for retrieving possibly fragmented data requested by a host. The distinguishing elements of the claims teach a reference to at least one allocation unit is contained in a list of references to defective allocation units of the first memory, storing, as a first part of the requested data, the data stored in the at least one allocation unit in a second memory; retrieving the requested data by retrieving the first part of the requested data from the second memory and retrieving a second part of the requested data from the first memory, the second part of the requested data being complementary to the first part of the requested data, and supplying the first and second part as a data stream, wherein the first memory has a nominal data retrieval rate and the list of references to defective allocation units is built up by monitoring an average retrieval rate with which data is retrieved from the first memory; determining whether the average retrieval rate drops below the nominal data retrieval rate; when the average retrieval rate drops below the nominal data retrieval rate, determining a part of the data of which retrieval causes the drop of the average retrieval rate; and adding to the list a reference to the allocation units in which data is stored of which the retrieval causes the drop of the average retrieval rate.
